/note="Organ: eys, Vector: pT7T3-Pac (Pharmacia) with a modified polylinker; Site 1: EcoR I; Site 2: Not I;
UI-E-EOI is a normalized CDNA library containing the following tissue(s): fetal eye. The library was constructed according to Bonaldo, Lennon and Soares,
Genome Research, 6:791-806, 1996, First strand CDNA synthesis was primed with an oligo-dT primer containing a Not I site. Double stranded cDNA was ligated to an EcoR I adaptor, digested with Not I, and cloned directionally into pT7T3-Pac vector. The olignoucleotide used to prime the synthesis of first-strand cDNA contains a library tag sequence that is located between the Not I site and the (dT)18 tail. The sequence tag for this library is CGGTATACC. This library was created for the program, Gene Discovery in the Visual System, supported by National Eye magning.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             6

modified polylinker; Site 1: EcoR I; Site 2: Not I;
// UI-E-EJI is a subtracted cDNA library constructed
according to Bonaldo, Lennon and Soares, Genome Research,
6:791-806, 1996. First strand cDNA synthesis was primed
with an oligo-dT primer containing a Not I site. Double
strande cDNA was ligated to an EcoR I adaptor, digested
with Not I, and cloned directionally into pT7T3-Pac
vector: The oligonucleotide used to prime the synthesis of
first-strand cDNA contains a library tag sequence that is
located between the Not I site and the (dT)1B tail. The
sequence tags for this library are: fetal eyes,
AGAATCAAGA; lens, CGATTAGCGA; eye anterior segment,
AAGACCCAT; optic nerve, CCATTAAGTG; retina, CCGGG; Retina
Foveal and Macular, GTCC; RPE and Choroid, ACCTA. This
library was created for the program, Gene Discovery in the
Visual System, supported by National Eye Institute (NEI)."
                                                                                                                                                                                                                                                                                                                                                                                                             University of Iona (1156 MEBRF, Iowa City, IA 52242, USA 1913 1335 8250

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           1 cattggagtcacgcggtggc.......gggggggcgtacccacttt 1253

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             g
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 1621, Application US/09949016

| Sequence 1621, Application US/09949016
| Patent No. 641239
| GENERAL INFORMATION:
| APPLICANT: VENTER, J. Craig et al. |
| TITLE OF INVENTION: WITH HUMAN DISEASE, METHODS OF DETECTION AND USES THEREOF;
| TITLE OF INVENTION: WITH HUMAN DISEASE, METHODS OF DETECTION AND USES THEREOF;
| CURRENT APPLICATION NUMBER: US/09/949,016
| PRIOR APPLICATION NUMBER: 60/241,755
| PRIOR FILING DATE: 2000-10-20
| PRIOR APPLICATION NUMBER: 60/237,768
| PRIOR PRILNG DATE: 2000-10-03
| PRIOR PILING DATE: 2000-10-03
| PRIOR FILING DATE: 2000-09-08
                                                                                                                                                                                                              Sequence 22599, Application US/09513999C

Patent No. 6783961

GENERAL INFORMATION:
APPLICANT: Duclert, A.
APPLICANT: Duclert, A.
TITLE OF INVENTION: Expressed Sequence Tags and Encoded Human Proteins.
FILE REFERENCE: 59.US2.REG
CURRENT APPLICATION NUMBER: US/09/513,999C
CURRENT APPLICATION NUMBER: US 60/122,487

PRIOR PILING DATE: 1999-02-26

Sequence 15628, Application US/09513999C

| Sequence 15628, Application US/09513999C
| Patent No. 6783961
| GENERAL INFORMATION:
| APPLICANT: Dunas Milne Edwards, J.B.
| APPLICANT: Dunas Milne Edwards, J.B.
| TITLE OF INVENTION: Expressed Sequence Tags and Encoded Human Proteins.
| Patent No. 678399L
| FILE REFERENCE: 59.US2.REG
| CURRENT FILING DATE: 2000-02-24
| PRIOR PPLICATION NUMBER: US 60/122,487
| PRIOR FILING DATE: 1999-02-26
| NUMBER OF SEQ ID NOS: 36681
| SEQ ID NO 15628
| LENGTH: 97
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    976 AGTCCAGACATCAACTCCAAAACTGAAGCTGCAGCAATGAAGAAGCAGTCACATACAGAA

GENERAL INFORMATION:
APPLICANT: WALLACH, Bavid
APPLICANT: WALLACH, Mark
APPLICANT: WALLACH, Mark
APPLICANT: METI, Iggor
TITLE OF INVENTION: MODULATORS OF TWF RECEPTOR ASSOCIATED FACTOR (TRAF), THEIR
TITLE OF INVENTION: PREPARATION AND USE
FILE REFERENCE: WALLACH=21
CURRENT FALLICATION NUMBER: US/09/155,676B
CURRENT FILING DATE: 1999-01-04
PRIOR FILING DATE: 1999-01-04
PRIOR FILING DATE: 1996-04-02
PRIOR FILING DATE: 1996-04-02
PRIOR FILING DATE: 1996-04-02
PRIOR FILING DATE: 1996-08-26
NUMBER OF SEQ ID NOS: 22
